## SKILLS

---

**Programming Languages:** JavaScript, WordPress, HTML, CSS

**Libraries & Frameworks:** React, Node.js, Bootstrap

**Tools / Software:** Git, GitHub, Bitbucket, VSCode, Jira, Linux, Terminal, NPM, Illustrator, Photoshop, SketchUp

## WORK EXPERIENCE

---

### AIM Consulting

*Web Developer*

**Tacoma, WA**

*May 2021 - Present*

- Creating, maintaining, and manually testing new or existing internal app features requested from stakeholders used by City of Tacoma Planning and Development employees using JavaScript.
- Maintained and added content using WordPress to support TacomaPermits.org.
- Provided software and account support to customers and city employees via phone or Microsoft Teams.

### Facebook Reality Labs via Q Analyst

*Project Coordinator / Research Assistant*

**Redmond, WA**

*September 2018 - April 2021*

- Built internal tools for research assistants to have a single workspace that contributed to better workflow and time management using React.
- Played a key role in early project completion, evaluated required tasks, delegated each member's strengths, and resulted in project delivery 20% sooner than estimation.
- Investigated, troubleshot, tested, debugged, utilized programming skills, and leveraged Linux and general OS tools in Ubuntu and Fedora to ensure quality enterprise systems and software deployment.

### Paint Logic

*Shop Manager*

**Seattle, WA**

*August 2011 - November 2017*

- Managed initial company website in WordPress. Then redesigned, developed, and launched the new company website with Bootstrap.
- Oversaw team, completed vehicle painting services for high-end cars. Supervised associates, drove financial operations including billing, and directed vehicle deliveries.
- Streamlined process flow to ensure target dates kept with strict adherence to schedules and trained new hires.

### Yuendi Design

*Designer*

**Seattle, WA**

*March 2016 - September 2017*

- Drafted 3D layouts and floor plans for kitchen and bathrooms on multi-million dollar residential and commercial properties.
- Monitored orders to be shipped to vendors, clients, and contractors up to 5 project locations.
- Handled photos to document the project process for clients, investors, and websites.
